July 2012

The Presidents Comment Corner

July 2012

It's with deep regret that I must announce that we lost one of our members over the last month. Mark Phillips passed away and will be missed by all who knew him. He was one of our enthusiastic racing brothers and a wonderful and kind person. A plaque honoring his life will be placed in his memory on our Fallen Flyers Plaque out at the field.

God Bless and we will miss you Mark!

Every month it seems as though we are achieving new goals throughout the club. This last month we reached a milestone in my opinion. We now have a working water system that provides fresh water for drinking and irrigation. A water sample from the well was taken to Basic Laboratories in Redding and came back clean or all bacteria and E-Coli and deemed safe for human consumption. The water in the bathrooms is still being supplied from our storage tank and should not be consumed. We have installed a drinking fountain and hose faucet out by the flight line. Enjoy! The pressure tank and necessary piping was paid for by the club and the installation of the system was done free of charge by Coy Williams of Williams Pump Service. Thank you very much Coy and if any of our members are in need of such services please give Williams Pump Service your business. 530-222-8402

Our Flying Ash Fast Warbird Race or should I say Woodstock II went beyond the expectations of all of us. Considering it was the first major racing event hosted by our club it was spectacular to say the least. Loren Braucht deserves a huge pat on the back for his commitment of time and energy to make this event happen.

June General Meeting Minutes

Old Business

Last meetings minutes were approved.

Ed was not here for a treasury report.

New Business

Jim Smith reported that our storage container was broken into again and 2 new weed eaters were stolen along with other misc items. The vents now have bars welded over them.

We have had many requests that people please do not smoke in the Pitts.

Our new lap timing system will be at the sky raider race for testing.

We are ready to move forward with the rest of our water project to add a pressure tank and water fountain for drinking water and irrigation. Williams pump service is donating his time and all parts a cost to complete this stage. The estimated cost is \$500 dollars. Cook concrete is donating the fountain and in ground box for the irrigation valve.

Loren Bracht motions and loren shaw seconded. Motion passed.

Loren updated us on the warbird race [on June 24th.](#)

- We need many volunteers so any and all members that can help please come down.

It would be great if everyone would please not put their broken airplanes in the trash. Please take them home with you.

Meeting adjourned [at 8:13pm.](#)

Submitted by: Danny Day

For Sale / Wanted

For Sale

Foam Super Cub w/ floats flown once. \$180 - Contact Lewis Franks, 347-418 or 945-50787

For Sale

Head on over to Redding RC & Hobby to check out the Under Reaction Thunderbirds by Jim Finch and Danny Day! Very Cool!

(continued from pg. 1)

No successful event happens without the support and help of many behind the scene volunteers and boy did our club members come through. I can't mention all the names in this message but just look at the members roster list and most offered some sort of help at the event.

Thank you very much to all for your support!

I don't want to end without thanking SAM's club of Sacramento for coming up and giving us their support and guidance in running this event. Particular thanks to JR for running the scoring, John Bigwood (president) for coordinating the flightline activities, and Joe for the colorful announcing. Yes as a first time event we made some mistakes and miscalculations but from what I saw everybody had a great time and the club made a nice profit. I'm certain that this event will grow in the coming years and become a premier event in the racing community and a great fund raiser for the club.

Newsletter Article Submissions

Club members, sharpen up those pencils. I'm looking for monthly articles submitted by our members. Let us hear about your latest build, newest airplane/helicopter, build tips, or first flight. We all share our ideas and stories out at the field, but what about the guy who wasn't there? Put those stories down on paper and share. Please have your articles in by the 20th of each month, to allow for arrangement into the newsletter.

Thanks,
 Newsletter Editor
